

Bo Norberg is the editor of [The Rondel](#). His main research interests at present are B12-associated medical problems and premature heart infarcts within some families of Northern Sweden. His university affiliation is The Department of Internal Medicine, University Hospital of Northern Sweden, SE-901 85 Umeå, Sweden.

[Bo Norberg](#) is available as lecturer, translator, author, and adviser, provided that problems and terms are suitable. His present views on health care, work organization, medical education and training, human psychology, ethics and ethnics are also evident from his essays in [The Rondel](#).

Key words:

B12
Medical education
Medical training
Health care
Work organization
Peace and reconciliation
Races and Religions, Holy Bible

Possible conflicts of interests

Adviser (advice, lectures, clinical expert reports) on B12-associated problems 1990-2010 to:

Abbot, Sweden
Abigo, Sweden
Astra Hässle, Sweden (now Astra Zeneca, UK)
Bristol-Myers-Squibb, Sweden
Buckingham, Doolittle & Burroughs (Ohio)
Conpharm, Sweden (now Meda, Sweden)
Dumex, Denmark (later Alpharma, Norway, now Actavis, Iceland)
Goldshield, UK
Meda, Sweden
Pfizer, Sweden
Pharmacia, Sweden (now Pfizer, Sweden)
Woerwag, Germany

Bo O. Norberg
Curriculum vitae September, 2010

Full name

Bo Oskar Norberg

Date and place of birth

Febr 22, 1936, Norsjö, Sweden

Schooling

Compulsory school in Långträsk 1944-50 and Bastuträsk 1950-51 (7 years).

Practical work in farming, forest-keeping and lumbering 1951-53.

The Christian Folk High-School of Solvik, Frostkåge, 1953-55.

Senior High School, The Private Elementary School of Lund, 1955-57, humanistic line.

Military service 1957-58.

Senior High School, complementary studies in natural sciences (mathematics, physics, chemistry, biology) 1958-59, Lund.

Professional and scientific training

Medical studies at the University of Lund from 1959.

Scientific training beside medical studies from 1964 in the Department of Internal Medicine, Lund.

Authorized as M.D. in 1971, as specialist of Internal Medicine 1975 and as specialist in Haematology 1976 by the Swedish National Board of Health.

Dissertation and "title docent" in experimental medicine 1971 (the title is thought to be equivalent to the PHD of USA, also often translated "associate professor"). Appointed an Associate Professor of Internal medicine at the University of Lund 1975. Then service as senior registrar, clinical lecturer and consultant in internal medicine and haematology at the Department of Internal Medicine, University Hospital of Lund 1975-80 and Department of Internal Medicine, University Hospital of Umeå 1980-87. Senior registrar (extra läkare med bül-lön) at Blood Centre, Umeå 1988-01-01 to 1989-06-30. Due to loss of detail vision (pseudoxanthoma elasticum,

Medical Trouble-Shooting, p. 28) halftime service as senior registrar (avd.läk., 23 hours a week) at the Department of Internal Medicine up to Febr 1, 2001; halftime "pension" (in reality free research time). The service included the tutoring of medical students and advice to scientists, institutions and companies. For chronological reasons, I retired from the position of senior registrar Febr 1, 2001, as is the Swedish law. Since then, I have an informal position as "guest researcher" and teacher in the same department. My quest is to prepare the probands of the families with premature myocardial infarcts for biomolecular analyses (cf paper 113), to guide Mats Nilsson to dissertation (original papers 108, 110-112, 114, and tree papers in preparation), to edit The Rondel, give lectures on demand, and teach students in clinical practise.

The successes of my career include the guidance of my exwife to her first professorship in nursing research 1980, my teaching of medicine to dental students in Umeå for 9 1/2 years, resulting in the compendium Integrated Medicine (200 copies, 114 pages) and together with Mörnstad "Medical Trouble-Shooting" (4000 copies, 162 pages). Furthermore, I have headed 7 NLV-SK week courses in Medicine for Primary Health Care (participants physicians in training for specialty), and the two first NLV/SK week courses of Oral Medicine in Sweden. From about 1984 to 1988 I promoted the development of the national association of patients with blood disorders (Riksförbundet för Blodsjuka), together with the late Arne Kristensson and the late professor Peter Reizenstein, MD. Another success was the guidance of Swedish neurologists to consensus in the vitamin B12 question (Läkartidningen No. 22, 1992).

Together with Kent Vänman, I edited the journal of the department, Invärtes & Utvärtes (Internal & External), from Oct

1994 to May 1998, 55 issues. I served as director for the training of future specialists in internal medicine and allied specialties at the department ("ST-rektor") from May 1995 to Oct 1998. In co-operation with about 20 independent co-workers, I am launching a national post-doctoral education programme on B12-associated clinical problems with physicians of primary health care as target group. The visual manifestations of this programme have been the discussion book "Controversies around vitamin B12" (Swe) (Pedagogförlaget, Klippan, Sweden 1998), 4,000 copies, and the electronic paper-free quarterly The Rondel (www.rondellen.net) in Swedish and English. I was one of four editors for the book "Controversies...". I also was co-author in four of the twelve chapters of the book. From start Oct 1, 1999, I am the editor of The Rondel.

I have guided five younger scientists to dissertation, and by now at least the skill corresponding to "PhD". I was sole scientific tutor (handledare) for Ulf Bandmann and Lars Rydgren, co-tutor with Lennart Domellöf as main tutor for Leif Athlin, main tutor with TK Nilsson and Kurt Boman for J-H Jansson, co-tutor for Mats Nilsson. The dissertations were:

1. Bandmann U. The effects of antitubulins on human polymorphonuclear leucocyte chemotaxis. Lund, Sweden 1976.
2. Rydgren L. The role of time-lapse filming in the analysis of human leukocyte lokomotion. Lund, Sweden 1980.
3. Athlin L. The human macrophage system. Effects of antineoplastic agents in vivo and in vitro. Umeå, Sweden 1986.
4. Jansson J-H. Studies on haemostasis in deep vein thrombosis, ischaemic heart disease and hypertension. With special reference to the fibrinolytic system. Umeå, Sweden 1990.

5. Nilsson M. Cobalamin communication in Sweden 1990-2000. Views, knowledge and practice among Swedish physicians. Umeå, Sweden 2005.

Now follows a detailed "curriculum vitae" in Swedish, a list of my original scientific papers in international language, scientific papers in Swedish, review papers, editorials, proceedings, letters to the editor, abstracts.

Sammanfattning av utbildning, arbetserfarenhet, vetenskaplig verksamhet, och pedagogiska meriter för Bo Norberg, Tvärågatan 1 L, 903 55 Umeå

Curriculum vitae

Född i Norsjö församling, Vb län, 1936-02-22.

7-årig folkskola, 1944-50 i Långträsk och 1950-51 i Bastuträsk.

Studieuppehåll med förvärvsarbete i jordbruk och skogsbruk 1951-53. Ett par månaders feriearbete varje år i nämnda näringar 1954-56.

Studier vid Solviks Kristliga Folkhögskola 1953-55, motsvarande 4-årig realskola, och realexamen som privatist i Piteå våren 1955.

Studier vid Lunds Privata Elementarskola 1955-57, motsvarande 4-årig latinlinje, och studentexamen på halvklassisk linje våren 1957.

Militärtjänst som sjukvårdare 1957-58. Komplettering med studentbetyg i biologi, kemi, fysik och matematik samt universitetsstudier i psykologi (ett betyg) 1958-59.

Med Kand examen 1961-05-30 i Lund.

Under perioden 1958 - 1962 feriearbetade jag någon vecka på Trelleborgs Gummifabrik (hälsovådligt arbete), sammanlagt 2-4 månader som vikarierande mentalskötare på Umedalens Sjukhus och Vipeholms Sjukhus, och en månad som vikarierande lab.sköterska vid Umeå Lasarett.

Under perioden 1963 - 1971 varvade jag de fria kurserna med läkarvikariat med medicinsk inriktning, och från 640301 forskarutbildning, först som 1:e amanuens vid Med Klin i Lund 640301 - 671031, senare som doktorandstipendiat vid Medicinkliniken i Lund 680901 - 710531. Läkarvikariatet under den här perioden översteg 16 månader, veckoslutsjourer som distriktsläkare omkring en gång i månaden oräknade.

Disputation för Med Dr. grad ägde rum 1971-04-02 och avhandlingen fick högsta betyg, "Berömlig". Jag blev docent i experimentell medicin 1971-12-14 och i invärtes medicin 1975-05-27.

Jag blev leg läk. 1971-06-21. AT-tjänstgöring höll på att införas under den här perioden. Jag fick tillgodoräkna delar av tidigare tjänstgöringar och började utbildning i internmedicin vid Medicinkliniken i Lund 1971-12-01. Jag fick specialistkompetens i allmän internmedicin 1975-01-22 och behörighet i hematologi 1976-02-26.

Under perioden 1975-09-01 - 1976-10-03 hade jag en forskarmånad med biträde i sjukvården, 4 månader som klin lär/böl, och 9 månader randutbildning på Njurmedicinska Kliniken i Lund.

Perioden 1976-10-04 - 1980-08-31 arbetade jag som biträdande överläkare vid Medicinkliniken i Lund, småningom med fast tjänst.

Utom den kliniska och vetenskapliga verksamheten var jag under perioden 1972 - 78 administrativt ansvarig för medicinklinikens cytologiska laboratorium och bedömde självständigt uppskattningsvis 2.500 benmärgspreparat och därtill en hel del andra aspirationsbiopsier från exempelvis lever, mjälte, lymfkörtlar, thyroidea och prostata.

Av familjeskäl flyttade jag till Umeå och vikarierade som avdelningsläkare vid Medicinkliniken, RiUm 1980-09-01 - 1983-08-31, som biträdande överläkare 830901 - 831130, som klin lär/böl 850201 - 871231. Fast tjänst som al vid Medicinkliniken 831201. Vikariat som extra läkare vid Blodcentralen 19880101 - 890630. Därefter halvt sjukskriven och senare halvt sjukpensionerad p.g.a. bilateral maculaskada med förlust av detaljseende. Sedan 19890701 halvtids arbete (23 veckotimmar) som avdelningsläkare, anpassad tjänst. Arbetet bestod i att handleda medicine kandidater i mottagningsarbete, bedriva utredningar av problemfall i öppenvård, forska om ärftliga sjukdomar, och ge vetenskaplig service till forskare, institutioner och företag. Sedan okt. 1994 redigerade jag tillsammans med Kent Vänman klinikkens informationsblad fram till maj 1998(55 nr), Invärtes & Itvärtes. Från maj 1995 till okt 1998 var jag studierktor för blivande specialisters utbildning vid kliniken ("ST-rektor"). Under perioden har jag varit administrativt ansvarig för 4 halvdagskurser med Janne Nording, "Personligt Effektivitetsprogram", och 4 tvådagarskurser med Glenn Granström, "Ledarskap i vården".

Under perioden 1971 - 2001 har jag deltagit i den kliniska undervisningen av olika elever i medicinsk utbildning (sjuksköterskor, tandläkarelever, läkarelever). Våren 200 fick jag ett pris i medicinsk pedagogik av Medicinska Institutionen, 5.000 kr att disponeras som forskningsanslag. Jag har också anlitats som föreläsare i NLV-kurser och andra sammanhang. Som kursledare har jag varit ansvarig för nio NLV-kurser. Efter ålderspensionering 010201 har jag en informell ställning som "gästforskare" vid Medicinska Institutionen i Umeå. Jag ska förbereda medlemmar i familjer med hjärtinfarkt i unga år att lämna information och prover till det genetiska projektet Genos, handleda Mats Nilsson till

avhandling (original papers 108, 110-112 samt tre artiklar till under skrivning), redigera Rondellen, handleda läkarelever i konsultationsteknik.

Vetenskaplig och pedagogisk verksamhet

På de följande sidorna grupperar jag arbetena i följande ordning med antal tryckta eller accepterade för tryckning inom parentes.

Original papers (112)
 Svenska arbeten (12)
 Reviews (1)
 Editorials (5)
 Proceedings (7)
 Letters to the Editor (4)
 Uppdrag "invited speaker" (6)
 Studieresor (2)
 Kongressdelt utan föredrag (3)
 Abstrakt (eng.) (30)
 Föredrag på svenska (30)
 Populärvetenskapliga art. (5)
 Vetenskaplig handl. (4 elever)
 Kursledare NLV-kurs
 INVÄRTESMEDICIN FÖR
 ALLMÄN MEDICINARE (85-91) (7 st)
 Kursledare NLV-SK kurs ORAL
 MEDICIN (2 kurser)

Original papers (1-114)

1. Norberg B, Söderström N. Radial segmentation of the nuclei in lymphocytes and other blood cells induced by some anticoagulants. Scand J Haematol 1967; 4: 68-76.
2. Norberg B, Söderström N. The effect of demecolcine on the oxalate-induced formation of radial-segmented nuclei (Rieder cells). Scand J Haematol 1967; 4::161-68.

6. Homocysteine and thrombo-embolic vascular disease. Implications for post-operative management. Cordoba, Argentina, May 31-June 3, 2000.

Studieresor

1. Med omvårdnadsforskare från Lund-Malmö-Umeå till Seattle och San Francisco 19/4-4/5 1980. Utom omvårdnadsforskning, teori och praktik, fick jag även se världens ledande centrum för benmärgstransplantationer i Seattle och leukemi-behandlingen i San Francisco.

2. Studieresa beträffande behandling av hematologiska maligniteter och särskilt multipelt myelom i USA 1/10-15/10 1983. Resan företogs tillsammans med Doc Anders Wahlin och vi fick diskutera behandlingsproblemen med ledande forskare i New York, Baltimore, Houston, Tucson och Toronto.

Populärvetenskapliga framställningar

1. Det svullna benet. Kulturartikel.
Västerbottens Folkblad 870605.

2. Rapport från en världskongress
(kemoterapi). Kulturartikel. Västerbottens
Folkblad 870801.

3. Cancer. En fruktad mandråpare.
Kulturartikel. Västerbottens Folkblad
871127.

4. Gäst i sagans land. Acotuellt nr 3, 1988,
sid. 8-11.

5. Framsteg i kampen mot blodsjukdomar.
Haema nr 2, 1988, sid. 13-15.

Vetenskaplig handledning

Ulf Bandmann, med dr. examen 1976 (BN
ensam handledare)

Lars Rydgren, med dr. examen 1980 (BN
ensam handledare)

Leif Athin, med dr. examamen 1986
(Domellöf huvudhandledare)

Jan-Håkan Jansson, med dr. examen 1990
(BN huvudhandledare, bitr. Torbjörn
Nilsson, Kurt Boman)

Mats Nilsson, beräknad 2003, Johan Lökk
huvudhandledare, Göran Westman och Bo
Norberg bitr. handledare.

Produktion av undervisningsmaterial (production of compendies and textbooks)

1. Norberg B. Integrated medicine.
Compendium., 200 copies, 114 pages

2. Mörnstad H, Norberg B. Medical
Trouble-Shooting. An introduction to
doctoring. 162 pages, 4000 copies. Meda,
Göteborg 1991.
